### Research Interests

- Social and affective neuroscience (social emotions such as empathy, compassion, brain plasticity, social decision-making, development of social cognition, psychopathology of the social brain)
- Neuroeconomics, caring economics and cooperation research
- Contemplative neuroscience, mental training, meditation and mindfulness research
- Multi-method approach (functional and structural MRI, rt-fMRI, TMS, behavioral methods, hormonal and autonomic measures, game theoretical and neuroeconomic paradigms, subjective measures and phenomenology, virtual reality paradigms)
